

# The New 2009 WindRider 17 Trimaran has launched!

The WindRider 17 will thrill expert and novice sailors alike - as well as family and friends!

Here's a boat that's been designed to thrill both the expert and the beginner — and everyone in between! Use it for a gentle day trip with family and friends or set off with your gear single-handedly for an adventurous camping trip. The WindRider's telescoping hull beams make it a snap to trailer and set up, and its wave-piercing polyethylene hulls and anodized aircraft aluminum construction create a stable, comfortable ride. You really have to work very hard to capsize the WindRider, and the high boom won't take your head off in a jibe!

The US-built WindRider is equipped with two cockpits for those who like to sail with friends and family. The aft and forward cockpits each seat one person and you can bring more buddies along with optional seats on the bolt-roped

trampolines. There's no tiller (unless you want one) and the boat can be steered with foot pedals from either cockpit. All sail controls are within two feet of the driver which makes soloing a breeze!

### **Features:**

- Main hull with dual cockpits with seats and backrest
- Fully-battened mainsail on a rotating mast
- Dual trampolines
- Telescoping hull beams for easy set up and trailering
- Foot-pedal steering for single-handed versatility
- Roller furling jib
